The mission of the International Journal of Doctoral Studies (IJDS) is to provide readers worldwide with high quality peer-reviewed scholarly articles on a wide variety of issues in doctoral studies using the Informing Science (IS) framework. The editorial objective of IJDS is the facilitation of knowledge enhancement related to doctoral studies in areas such as (but not limited to): informing science, information systems, information technology, information science, information security, and IT education.

IJDS especially encourages publications authored by faculty members who actively supervise doctoral students. Joint publications between faculty members and their doctoral students are also encouraged.

IJDS is an interdisciplinary forum that publishes high quality articles on theory, practice, innovation, and research that cover all aspects of doctoral studies. Book reviews are also welcome. Authors may use body of knowledge from business, information systems, computer science, education, psychology, engineering, anthropology, and such. Papers that essentially cover "teaching tips", "best practices" or unstructured anecdotal data are not considered for publication. IJDS provides those who submit manuscripts for publication with useful, timely feedback by making the review process constructive. IJDS will strive to be the most authoritative journal on doctoral studies.

IJDS is an academically peer reviewed Journal. All submissions are blind refereed by three or more peers. IJDS is published in print by subscription and its articles also appear online free of charge on the web site <http://ijds.org>
